Available for freelance and contract work: remote, hybrid or on-site in Bangalore

PROFILE

Cloud and DevOps engineer with 14+ years in IT, including more than nine years working for Dutch banks, payment companies and a large telecom operator (ABN AMRO, Knab, SurePay, VodafoneZiggo). Most of my work is on AWS with Terraform, ECS/Kubernetes and GitLab CI/CD, usually in regulated environments where security and audit requirements drive the design. I am now based in Bangalore and take on freelance and contract engagements for Indian and international clients. Results from earlier roles: incident handling time down 60% at VodafoneZiggo, release cycle time down 30% after moving teams to trunk-based development, AWS costs down 20% at both Knab and SurePay, and about €20K per month saved at ABN AMRO by automating mobile CI/CD for 8 teams.

WHAT I CAN HELP WITH

- AWS landing zones and multi-account setup with SCPs, IAM, networking (TGW, VPC) and security baselines
- Terraform module libraries and IaC standards that several teams can reuse
- CI/CD pipelines (GitLab, Azure DevOps, Jenkins) with SAST, image scanning and secrets management built in
- Container platforms on ECS Fargate and EKS/AKS, including Helm and GitOps style deployments
- Observability with Prometheus, Grafana, OpenTelemetry and centralised logging, for cloud and on-premises
- AWS cost reviews and rightsizing, and DevSecOps and compliance readiness for fintech and banking teams

TECHNICAL SKILLS

Cloud (AWS)	EC2, S3, Lambda, RDS, IAM, Route 53, ALB, VPC, Transit Gateway, SG/NACL, CloudWatch, CloudTrail, Secrets Manager, ACM, KMS, ECR, ECS Fargate, EKS, Organizations/SCP, Config, GuardDuty, Security Hub, Shield, WAF
Cloud (Azure)	AKS, Azure DevOps, Azure Monitor
IaC	Terraform, CloudFormation, AWS CDK, Ansible
CI/CD	GitLab CI/CD, Jenkins, Azure DevOps, AWS CodePipeline, JFrog Artifactory, trunk-based development, GitFlow, semantic versioning
Containers	Docker, Kubernetes (EKS, AKS), Helm, ECS Fargate
Monitoring	Prometheus, Grafana, Vector, node_exporter, OpenTelemetry, Datadog, Splunk, AppDynamics, ELK/Kibana
Security	DevSecOps, HashiCorp Vault, SonarQube, Twistlock (Prisma Cloud), OWASP, SSL/TLS, KMS encryption, IAM policy design
Programming	Python, Bash, PowerShell, Java, JavaScript, YAML, Android and iOS (Objective-C)
Ways of Working	Agile, Scrum, SRE, platform engineering, cost optimisation, team leadership

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer

Apr 2024 – Feb 2025

VodafoneZiggo, Utrecht, Netherlands

Enterprise DevOps and cloud programme for one of the largest cable and telecom operators in the Netherlands.

- Rolled out the shared DevOps toolchain (GitLab, HashiCorp Vault, JFrog Artifactory, SonarQube) used across several business units.
- Designed and built hybrid monitoring that collects metrics and logs from on-premises servers and AWS through Vector and node_exporter into Prometheus, with Grafana dashboards for operations. Incident handling time went down by 60%.
- Led the move from GitFlow to trunk-based development, which reduced release cycle time by 30%.
- Automated semantic versioning in the pipelines so each deployment can be traced to a specific version in every environment.
- Provided 24/7 production support for the platform, keeping downtime low and resolving incidents quickly.

Senior DevOps Engineer

Feb 2023 – Feb 2024

Knab Digital Bank, Amsterdam, Netherlands

Cloud infrastructure for a Dutch digital bank operating under strict financial regulation.

- Designed Terraform blueprints, deployed through Azure DevOps pipelines, that met the bank's financial services compliance requirements.
- Introduced Service Control Policies across the multi-account AWS organisation to enforce guardrails and standard configuration.
- Designed an event-driven flow for transferring financial transaction payloads, encrypted with AWS KMS using asymmetric and symmetric keys.
- Reduced infrastructure cost by 20% through automated resource lifecycle management.
- Added automated policy and governance checks to the pipelines to keep the security posture consistent across accounts.

Senior DevOps Engineer / Cloud Engineer

Jun 2021 – Jan 2023

SurePay (via Mobiquity), Utrecht, Netherlands

IBAN-name verification service used by banks across Europe.

- Designed and built the ECS Fargate platform end to end, covering networking, application and security layers.
- Wrote a Terraform and CloudFormation module library that multiple teams used for consistent deployments.
- Built deployment pipelines with security scanning, artefact management and automated testing.
- Cut AWS spend by 20% through rightsizing and architecture changes.
- Designed the onboarding platform used to integrate new bank clients onto the service.

Cloud Engineer / Tech Lead / Mobile Developer

Dec 2015 – May 2021

ABN AMRO Bank (via TCS), Amsterdam, Netherlands

Worked on the mobile banking platform for over five years across development, team lead and cloud engineering responsibilities.

- Designed a multi-tenant ECS Fargate architecture for the mobile banking platform that met the bank's security and compliance standards.
- Led a team of 5 Android engineers, delivering secure mobile banking features on schedule.
- Built mobile CI/CD pipelines used by 8 development teams. Full automation of builds and releases saved around €20K per month.
- Implemented SSL pinning, code obfuscation and fraud prevention controls in the iOS and Android apps.
- Replaced manual release steps with automated pipelines, which removed the main bottleneck in the release process.

Application Developer

Jun 2012 – Nov 2015

General Electric (via TCS), Bengaluru, India

- Developed cross-platform enterprise applications for GE Healthcare.
- Took part in architecture reviews and requirements analysis for large IT projects and worked with teams in India and Europe.

System Engineer Trainee

Mar 2012 – May 2012

Tata Consultancy Services, Gandhinagar, India

- Trained in Java, SQL, HTML, CSS and JavaScript and built an end-to-end Java project as part of the programme.

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
- Microsoft Certified: Azure Fundamentals (AZ-900)
- Professional Scrum Master I (PSM I) and Professional Scrum Developer I (PSD I)
- Generative AI Fundamentals (Databricks)
- Certified Kubernetes Administrator (CKA), in progress

EDUCATION

Bachelor of Engineering, Mechanical Engineering

2007 – 2011

T.I.E.I.T (RGTU), Bhopal, India

ADDITIONAL INFORMATION

Languages	English (fluent), Hindi (native), Dutch (A2)
Work status	OCI cardholder, no visa or permit needed to work in India.
Interests	Yoga and meditation, chess, hiking, table tennis
